Mapping of Course outcomes with Program outcomes

Course outcomes are statements that specify what learner will know or be able to do as a result of a learning activity. Outcomes are usually expressed as knowledge, skills or attitudes. These statements clearly indicate what a student knows and is able to do as a result of learning. PSOs describe what a program is expected to accomplish. Pos describe attributes as specified in a program. Course correlation matrix shows the learning relationship (level of learning achieved) between course outcomes and program outcomes of a course. This matrix strongly indicates whether students are able to achieve the course objectives / Outcomes of a course. The matrix can be used for any course and is a good way to evaluate course structure. In general CO-PO mapping will be assigned to the faculty. The subject expert will be nominated for respective courses. The expert has to consolidate CO attainment level and PO attainment level of individual courses at the end of the semester.

CO-PO And CO-PSO Mapping of Courses :-

All courses must cover all the Pos and PSOs. For a course we map the COs with POs through the CO-PO-PSO matrix. The various correlation levels are as shown below,

1---slight or low correlation

2---medium or moderate correlation

3---High correlation

• indicates there is no correlation.

Evaluation of Attainment of Program Outcomes, Program Specific Outcomes And Course Outcomes :-

At college level evaluation of attainment of program outcomes, program specific outcomes and course outcomes is done through direct method (Result Analysis) and indirect method

(Student's feedback).Which helps to improve the education quality of college and graduates.

Direct Method :-

Preparation of learning outcomes across all the programs and courses. Program outcomes, Program specific outcomes and course outcomes are gathered for different courses.

Then calculations are done for measuring attainment of the outcomes and represented in result analysis of every department. Another methods are also used to measure attainment of outcomes such as collecting evidences on students learning directly,work submitted by students, skills, demonstrations, attitude etc.

Attainment of POs,PSOs and course outcomes of course at UG level :-

i)Attainment level in university Examination for B.A.---80%

Attainment level in Internal Examination for B.A.---20%

ii) Attainment level in university Examination for B.Com---80%

Attainment level in Internal Examination for B.A.---20%

iii) Attainment level in university Examination for B.SC---70%(CBCS Pattern 35marks)

Attainment level in Internal Examination for B.A.---30% (15 marks)

The attainment of outcomes is calculated by using following formula,

Attainment Ratio = Sum of marks (Internal + external)/ Total Student number

Good Attainment Score are more than 65.
