Degradable Waste

Non-degradable Waste

Recycling is an essential element of e-waste management. Properly carried out, it should greatly reduce the leakage of toxic materials into the environment and mitigate against the exhaustion of natural resources. However, it does need to be encouraged by local authorities and through community education. Generally the non-degradable waste is sent to parent institute for recycling.

Green campus

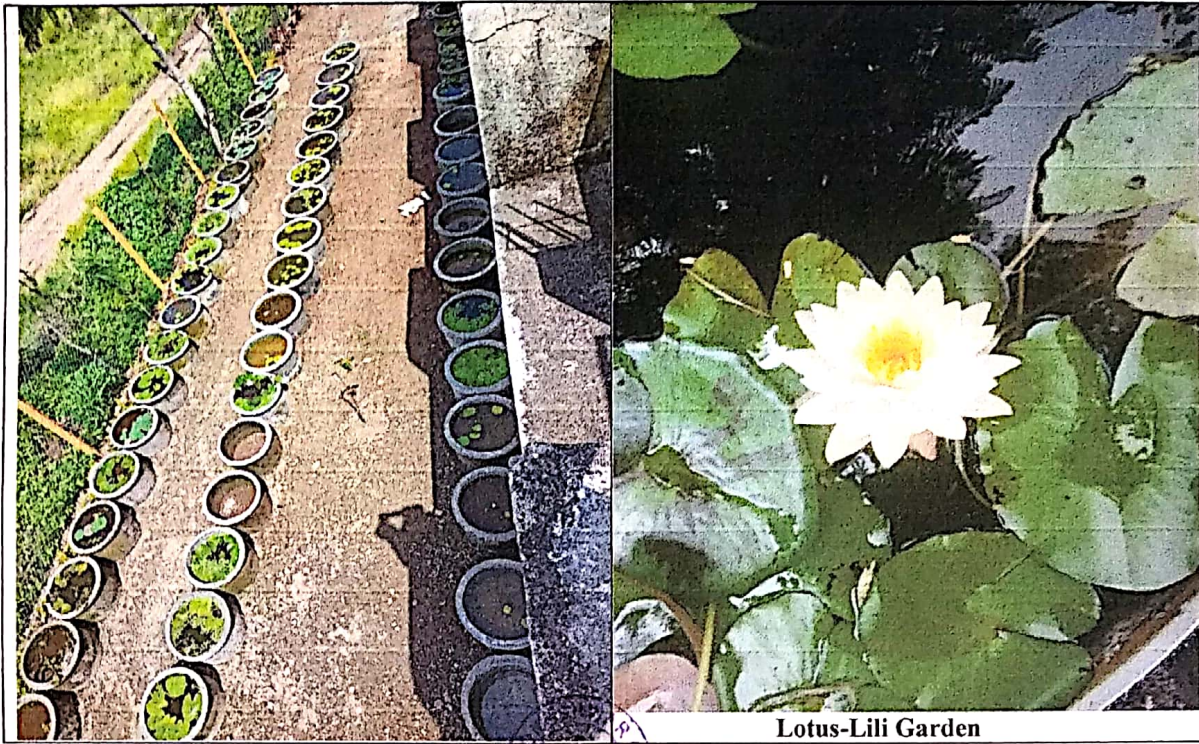

The college has shifted to a new building in 2016-17. The structure of the building has been constructed considering the slope of the hill. But since this area is a permanent drought area, there is always a problem of water in this place. Therefore, the college faces a big challenge of creating an environment-friendly environment for the education of students. For this, Principal and IQAC have work and selected 'Green Campus' best practice of college.
