Green campus

The college has shifted to a new building in 2016-17. The structure of the building has been constructed considering the slope of the hill. But since this area is a permanent drought area, there is always a problem of water in this place. Therefore, the college faces a big challenge of creating an environment-friendly environment for the education of students. For this, Principal and IQAC have work and selected 'Green Campus' best practice of college.
